Denysov Oleksii
Middle QA Engineer

SUMMARY:

I`m a client-oriented Quality Assurance Engineer with 2+ years of experience in Medtech and E-commerce domains. I specialize in testing web and desktop applications. Additionally, I have about 5 months of experience as a Scrum master and an understanding of Object Oriented Programming (Java) with basic experience.

SKILLS:

- Agile (Scrum, Kanban);
- Web testing (2+ years);
- Desktop testing (1.5+ years);
- Front-end and Back-end testing;
- Writing test documentations (Test Plan, Test Suits, Test Cases, Requirements Traceability Matrix, Bug Report, Gherkin Scenarios, Test Report, Test Summary Report, Tickets);
- Review requirements and Test documents;
- Types of testing: functional, smoke, sanity, regression, E2E, L11N, etc.;
- Create scope for Test Automation;
- Monitoring and collection of metrics;
- Operate Testing Environments (run, deploy new version to it, rebuild, check logs);
- Writing user guide manuals;
- Perform and control API testing;
- Work on behalf of Scrum Master role:
    - Coordinate testing efforts with other team members to minimize duplication of work and increase efficiency;
    - Deal proactively in team retrospectives, suggesting and implementing improvements. Drive icebreaking sessions for better collaboration;
    - Establish meetings to work closely with BA and Dev Lead.

CORE TOOLS:

Confluence, Atlassian JIRA, X-Ray, TFS, TestLink, Mantis, TeamCity, Gherkin, Kibana, Metric Collection Tool, SQL Server Management Studio (SSMS), DBeaver, Postman, Swagger, VMware, Electron, JMeter, Dynam Soft, Zebra, Slack, Teams, Zoom.

EXTRA TOOLS:

Java, HTML, CSS, Git Desktop, Intellij IDEA, Selenium WebDriver, Project Excellence, Office Manager HS.
